young, who have good digestion and a great help to circulation. the skin that is in need of attention.

For them, as well as the rest of womankind, there is salvation in the beautifying buttermilk bath.

If your skip is thick and sallow and oily the astringent qualities in the milk will correct that and render it white and free from oil, and like a glove for smoothness. If your skin is thin and sensitive, the sort that a strong wind will dry and crack, the buttermilk will here act as an emollient, making it soft and velvety, and at the same time impervious to the bad effects of sudden changes of tem-Derstun.

If you sunburn and tan and are inclined to freckle, the buttermilk acts as a bleach, whitening and refining the skin as nothing else will. It stimulates the pores and is a corrective for most of the minor silments and imperfections to which the skin is prone.

Is it expensive? That depends entirely upon the sort of bath you wish or can afford to take. Br termilk costs 6 cents a quart, and if are takes a tub bath of it nightly at least five a medium for massage it will be just gallons will be necessary, and that as apt to make hair grow as if it were will count up to a pretty penny in a month, but a single quart will be almost, if not quite, as beneficial if used with discretion.

Of course, the ideal way is to lie in a tub full of the milk, after the other bath, but equally good results will be obtained by the following method:

"First thoroughly bathe the body, as usual, with warm water and soap. See that the bath water is always softened by some means-bran or borax will answer, though the former is to be preferred. If the skin is inclined to be sluggish, a brisk and thorough scrubbing with a brush is advisable, so as to promote circulation and free the pores.

"Before getting into the tub prethe entire quart. When the bath is over drain the tub, but remain in it. Scoop the buttermilk up in the hands. and lave the body, using a circular motion to insure its absorption by the

"Special attention must be given to the face, arms and shoulders, which should be bathed first. For the neck, shoulders and arms the circular mo-

As a rule we don't bath. use or refer to testimonials in addressing the public. but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedving improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment—the kind of nourish- of a cooling or reanimating bath it ment that cannot be ob- should be of buttermilk, and the tained in ordinary food. No system is too weak or delicate to retain Scott's poses, but leaves one saltresh and Emulsion and gather good | sweet as possible. from it.

We will send you a sample free. SCOTT & BOWNE 409 Pearl St., N. Y.

So long as the circulation is weak, tion in applying the buttermilk is the ado, lauding the merits of the goods the digestion poor or the liver slug- one to be employed, especially the he carried, trying to imitate the brogue gish it is not to be expected that one forearm, as it will tend to develop and fof a Jaw peddler; but he overdid the can have a really good complexion, make it rounder, and the motion lingo stunt, and I soon divined his but as there are many women, old and should be toward the shoulder; that's true character, summoned help and

circulation and whose livers are as "But for the face any motion that well behaved as the majority whose is at all similar to massage is to be general health is up to the average, avoided. It seems almost outrageous and who still lack the outward and to make the assertion that massage visible signs of all this inward well has ruined more skins than any one being, it is reasonable to suppose that thing, and yet good authorities say the trouble is local, and that it is that it is a fact that has been proved again and again.

"It is not by any means the cold oreams used that produce the unsightly hairs on the face that have worried so many women," said one authority; "it is the massage that stimulates to unwonted activity the glands that supply nourishment to the hairs.

"The head is massaged to produce a more luxuriant growth of hair, and, if a cold cream is made without animal fats of any kind in may be applied to the face and then wiped off, with very good results, and be perfectly harmslightest inclination in that direction."

To be the face with buttermilk, pat it in, almost slap it in, but do not massage it. Buttermilk is an animal product, which, to be sure, all fats have been removed, and even when dried on the skin it will not show the least bit oily, but if used as and tied him to a tree, piling dry still full of the original fats contained in milk and cream.

As a skin food buttermilk has no peer, it is asserted; it is a tissue builder, feeding the starved cuticle with healthful nourishment, softening the harsh, dry shin and acting as an astringent upon the flabby, relaxed

There is no broad and easy high coad to beauty; if you don't happen to possess it as a birthright, it must be acquired, in many cases, by selfdenial, watchfulness and never-ceasing care of the body. But the game is worth the candle, and in this day and age, with nine women out of ten

Cosmetics ewere never more plentiful nor of better quality than they are now, nor have they ever been so natural in appearance, and yet never before were kwomen more chary of Sunny South. their use, more auxious to obtain the real beauties of skin and complexion

which cosmetics only simulate.

Beauty culture must be by a syssmatic sprocess, not a haphagard, spasmodic attempt, else the time spent is wasted and the effort in vain. It is the nightly buttermilk bath that works the wonders, not the weekly, and theimily that is absorbed by the pores seems to tone up the whole system, the skin having first been

After the body has been thoroughly laved, the buttermilk should be left on for a few minutes, and then carefully dried[with a soft towel by patting(not rubbing) the whole body and the face, just as a little baby is dried after its bath. The flesh will glow, and your sleep will be the most refreshing you have had since you were a child, and you will wake the next morning and wonder where in the world that velvety skin and those pink cheeks came from, and even your eyes will look brighter.

Every season has its special pernicious effect upon the complexion, and the woman who has learned the secret of refreshing her skin with buttermilk finds in it her weapon to combat the tan and sunburn of summer, and the roughening and chapping winds of winter, as well as the sudden changes of temperature of the intermediate seasons. After any outdoor sport, after dances, after over-exertion-in fact, whenever there is need beauty of it is that it does not leave a sour oder, as do milk and cream when they are used for bathing pur-

## Safe Occupation.

Bridget, the pretty young maid-of all-work, confided to her mistress when taking service that she had lately become engaged to be married. She stated, however, that she and Tim would have to wait two years, and in the meantime she wished to be earning money.

When Tim made his first call one evening the family remarked that they had never known so quiet a man. The sound of Bridget's voice rose now and then from the skitchen, but Tim's words were apparently few and far be-

"Tim is not much of a talker, is he. Bridget?" said the mistress of the house the next morning. "I should scarcely have known there was anyone with you last night."

"He'll talk more when we've been engaged a while longer, I'm thinking, ma'am," said little Bridget. "He's too bashful yet to do anything but eat, ma'm, when he's wid me!"-Tit-Bits.

## Father's Forgetion Classics.

William had just returned from College to spendthis spring vacation. One of the things most noticed by the young man was Fanny, the daughter of Si Perkins, a near neighbor, who had during his absence changed from a tomboyish school girl into a very beautiful young woman. It seems his father had also noticed the change, and remarked to his son:

"William, have you noticed how old Si Perkine' daughter, Fanny, has shot up? Seems to me she's gittin' to be a jolly handsome young crit-

"She certainly is father," said William, enthusiastically. "Fanny is as beautiful as Hebel"

"Where's your , eyes, boy?" on lected the father. "She's a durn sight purtier than he be. Old Si is as homely as Bill Jone's buil pup." -Harper's Weskly.

Good Profit in Alfalfa.

After 20 years' residence in Colorado and Wyoming, where alfalfa is considered as indispensable as the horse or cow to which it is fed, the writer was very much surprised on his return to the East to find that, while the virtues and values of this crop are very well known, very little ground had been planted to this grass.

My experience with alfalfa goes to prove it the most valuable hay crop to the farmer and dairyman and hog raiser that he can grow, comparing the cost of planting and harvesting with any other crop, and which once established he will never be without. Some of the reasons why farmers have not planted alfalfa were given. One was that it would not grow in the Now, if the statement of the Government agricultural bureau that alfalfa will grow "anywhere from sea level to a circuitous route to the still sure cient, the evidence of fine fields of alfalfa from which four and five crops a year are cut, at all of the State experiment stations, besides various fields belonging to the more enterpriswould doubtless be the last oppor- ing farmer, scattered all over the Midtunity he would ever have of finding dle East and Eastern States, ought to thoroughly convisce the most backward farmer that it is time for him to avail himself of the excliest opportunity to get started a good field of this valuable crop. Interference with rotation of crops was also given as a reason why it had not been Then we put him to work splitting planted, and to one who knows its value, both as a perennial crop and also as a soiling crop, it sounds absurd. The man who once gets to the front with a field of grass from which he can harvest from three to five tons of hay, having a value per ton exceeding any other grass or forage crop he can raise, will hesitate before plowing it under, but when he is ready te do so can follow it with a crop of corn or any other crop, harvesting with larger returns than he has known for years.

Others told me they had no good land to spare for alfalfa, as they had an acre, while alfalfa, with less than half the expense of planting and State experiment stations. You each help pay the cost of all this experiment work, and in the whole list there is no one crop that bears a bettar recommendation from all of them. and in addition to these re ports there is not a farm journal published that does not contain dosens of testimon-

## Indian Humor.

A good story is told on John R. Thomas, of Muskogee, a well-known lawyer of that city, who was formerly judge of a Western district. One night Thomas found himself in a shabby little town which had no hotel. Desiring to stay all night, he asked a lounger in front of a grocery store where he might find accommodations. The lounger went inside of the store, which was run by an Indian. When informed that there was a man outside who wanted a place to spend the night, the Indian asked:

"Judge Thomas," was the reply. "Well, if that's the fellow, he had better pay me what he owes me before asking me for any favors." "How is that?" queried the loung

"Who is the fellow?"

er. "Ishe in debt to you?" "Yes," replied the Indian. "When he was Judge at Muskogee I was brought before him for selling liquor. I was convicted and in sentencing me he said, 'I will give you 60 days in jail and \$100.' I got the 60 days all light, but he never came across with the \$100."-Kansas City Journal.

## How He Found His Church.

An Episcopal regeor traveling in the South met a native who claimed that he also was an Episcopalian. "Who confirmed you?"

"Nobody. WLat's that?"
"But didn't you tell me you were an Episcopalian?"

"O, yes," said the old man, "and has just been completed at Pembroke, I'll tell you how it is. Last spring I N. Y. It is 102 feet long and four went down to New Ocleans visitin', feet four inches wide. To fill this While I was there I went to church, incubator a single time with common and I heard 'em say they had left un not thoroughbred eggs, would require done them things they'd oughter done, I've been an Episcopal ever since."-Obristian Register.

Educated in Poker.

Gen. J. Franklin Bell, who was at the head of the artillery and infantry was invited to a dinner given in the suse of education.

When time came for the speeches many of the educators were called upon and glorified education. Then Gen. Beil's time came. He said he did not know exactly why the toastmaster had pounced on him, for he was not a specialist in education of a kind limited in its application.

"However," he said, "I have been interested in what the speakers preceding me have said about education. Still I think that out our way, in the West, not so much store is set by it as here in the East. I am reminded of the story of the two boys in Omaha who, I regret to say, were playing poker in a doorway, using kerne is of corn for chips.

"During the game one pushed in a bunch of kernels and said, 'I'll bet you a hundred.'

"'I'll raise it a hundred,' said the

" 'I'll raise that a thousand.' "'I'll see the thousand and raise it

million. "'I'll raise that million a billion.

"'I'll see the billion and raise you trillion.

"The other boy was stumped. He thought a long time, but he couldn't remember what came next, so he said, bitterly, 'Take it, you educated son of gun! "-New York World.

#### Took it for a Valise.

The overland train had just arrived and a crowd of guests, all anxious to register at the same time, blocked the space in front of the counter at the Palace Hotel. In the crowd was an elderly lady from Attleboro, who man aged, by the exercise of much dexterity to squeeze in between two traveling men and get possession of the register in advance of what would have been her turn in the regular course of events. She inscribed her name, asked the clerk in a very businesslike manner to give her a room and bath before they were all given out, and then moved back a step.

"Pardon me, madam, but you are stepping on my foot," declared one of the travelling men who had been elbowed to one side by the impetuous visitor from Attleboro.

"Indeed!" she retorted, quite savagely. "Then I beg your pardon. I thought it was a valise."

#### A Matter of Equilibrium.

Dr. Torrey, the English evangelist who was recently conducting meetings in the West, is a man of ready wit, which he uses with effect when interrupted while speaking. On one cross and concunced, waveringly, that he did not believe everything in the

"I don't see how anybody can walk on water," he declared. "Can you do it, Dr. Torrey?"

The preacher looked grimly at the man for a moment, and then answer-

At was found to be a shell, which had been fired by the Federale as the battle of Franklin forty years Fight With an Orang Outang. .

Philadelphia, Pa., March 11.-Three able bodied seamen and the first mate school at Fort Leavenworth, Kansas, of the schooner Hetty Erb, are laid up as the result of a fight with a pet orang-outang. The fight occurred while the schooner was on the way to this port, and was carried on for two days, and in that time that animal had decidedly the best of the

> The orang-outang was given to Isaac Erb, captain of the schooner, while the boat was loading at Charleston, S. C. The animal was evidently adapted to life on a boat and seemed to enjoy climbing through the rigging. He was soon acknowledged to be the best sailor on board, and the crew named him "Teddy."

"Teddy's" dignity was offended by a sailor feeding him a piece of cake coated with red pepper; and the fight began immediately.

For two days the crang-outang ruled the comings and goings of the crew. They were kept on a constant move, and the man at the helm was often compelled to leave his post and seek shelter in the hold. On the third day, however, "Teddy" became entangled in some ropes. The sailors saw their opportunity and sprang upon him before he could extricate himself.

The following is the list of injured James Harding, mate, laceration of scalp and severe contusions on body. Peter Williams, sailor, lacerations and bruises right arm and leg. John Risley, sailor, lacerations of face and contusions on back. Henry Hales, general, contusions.

# Sermons That Make Boys Sleepy.

"When I was a boy the whole family wont to church," says Bob McColloch to the Kaasas City Journal, "We lived in the country, and every Sabbath morning the family coach was pulled out, a team hitched to it, and the family was piled in. The roads were awful, but that made no difference, we had to go. "I well remember that mother put

on her Eunday dress. It was a black silk and somewhere in it there was a pocket, and in the pocket a handkerchief, and in the handkerchief some cloves. When we got to the church I remember we went up in front where my father had a pew. "When the preacher got to going I

also remember that some of us children would begin to get sleepy. And then I know that mother would take out that handkerchief and give out a clove to each one of us youngsters to keep us awake. I was thinking about it just the other day. And I just wondered if a child or a man, in these modern times, would take a clove out of his handkerchief, or pocket, in church, and put in his mouth, what in the occasion in London a bibulous fellow world his neighbors would think of

Common Sense va. Prejudice.

Here is a letter every word of which worth reading :

New York, March 16, 1906

Gentlemen:-The number of patients now suffering from chronic rheumatism along the Atlantic seaboard sceme to be very much larger than at the same period last year. This is due, some physicians claim, to the present abnormal climatic conditions. Ninety per cent of these attacks could becured up in five or ten days' time if the proper remedies were used. You. no doubt number amongst your readers hundreds of persons suffering from. that disease.

Dr. Drummond's Rheumatic Treatmen' cures all curable rheumationand what we want is an opportunity to tell your readers about it. After we have had that opportunity, if they don't buy it from their druggists the fault will not be ours. We will have done all we could for them.

Remember, we claim that Drummond's has positively cured-notmerely given temporary relief-more rheumatics during the past 20 yearsthan all other ready-to-use remediescombined. Our record books are open for your inspection in competition with all other manufacturers to prove this. Free-samples or guarantees-to-

oure-or-money-refunded - offers de

not prove whether a remedy for any

disease is good or bad. Such advertisers only give sick people an opportunity to experiment on themselves at. the advertiser's expense. Do they want to go on experimenting? Our proposition appeals to common senseand is more convincing than any other ever made to rheumatics. We prove-no mystery or experimenting -that they don't get the best rheumatic treatment unless they get Drummond's. We do much more for them than other advertisers of rheumstir remedies and they miss the best ? they fail to investigate our offer. They will find it the most liberal one ever submitted to them.

It would take this entire page to briefly tell them how different our way of doing business is from all others, but we believe they are willing to meet us half way, and 2 cents is all it will cost them to get our proposition and full literature on a Rhevmatic Treatment that cures where others fail. Drummond's is a Dece tor's Treatment, thoroughly uptodate, scientific and not a mystifying fad or cure-all. If they don't wantto be cured but want to continue experimenting with uncertainties, thenthey should not get Drummond's.

Is it not the duty of every theumatic to immediately investigate our claims and find out what we have to offer? The literature we send out is worth \$25 to any rneumesic. Don't wait, Mr. Rheumstie, and for-
